EMPLOYMENT

Salesforce Consultant	Appirio	December 2019 – Present

Roche Pharma
- Built complex functionality for the Swiss multinational healthcare clientele including Health Cloud Setup, Patient Management and communities using Health and Community Cloud
- Extensive experience building Apex Triggers, Process builders, web-to-lead, Workflows, Lightning Components
- Acted as a Dev Lead too and helped colleagues in solving technical challenges in parallel

Microfocus
- Successfully implemented transition from process builders to apex triggers
- Single handedly built CI and CD system from scratch for Salesforce Release management using Salesforce DX, Jenkins
- Removed existing code quality issues in Apex, SOQL & Lightning
- Learnt basics of a Salesforce Administrator, junction objects, master-detail & lookup relationships, schema builder, reports and dashboard management, inclusion of Google Maps API to dynamically display addresses

Technology Analyst	Infosys	Jul 2015 – Nov 2019

ICA
- Full Stack Java Developer for Enterprise Merchandising & Category Management Suite
- Developer backend solution for assortment module to persist data
- Batch scripts to automate database conversion from legacy systems to Fusion product hub & consumed Liquibase scripts to create database
- Implemented a procurement calculation engine primarily written with Sencha GXT and Hibernate framework, this calculation engine predicts the overall cost of an item and helps negotiation with the suppliers
- Pioneered DevOps transformation in the project empowering developers with best-of-breed tools for development, testing and deployment viz. CI/CD, Automated Code Quality and automated unit & system-testing.

Summer Research Intern	Bhabha Atomic Research Centre.	May 2014 – July 2014

- Developed an algorithm for KUKA KR6 Robot, so that it can draw the sketch of a captured image on any arbitrary surface.
- This robot is now deployed at BARC for making portrait of visitors
- Demo1 & Demo2
